ORIGINS

There is a reason for the phrase, Greatest Of All Time. The G.O.A.T. Coffee was discovered by a herder due to its stimulating effects on goats who had been feasting on it. This was in Ethiopia.

“Good communication is just as stimulating as Black coffee and just as hard to sleep after.”

KOPI LUWAK

My name is *Paradoxurus hermaphroditus* but you can call me Asian Palm Civet . You will find me in the Indonesian islands. I love me some Coffee Berries. I eat them in plenty. They give me some energy. When I poop, man comes in to scoop my poop. Then man processes it and earns top dollar. They call my poop Kopi Luwak. Question I ask man is ‘Where is my commission mate?’ You said we were in this together.

Beethoven would count coffee beans one by one till he reached 60 before he could brew. This became part of his morning routine.

COFFEE MAKING

**MANUAL
EDITION**

When it comes to coffee making, all coffee lovers start with the two basic ingredients- hot water and coffee. After that, they start diverging into their own particular woods depending on their individual particular set of skills.

ANZA CONCRETE ESPRESSO MACHINE

Looks like something the great architect Louis Khan would have approved. A piece of concrete slab that can produce coffee! Look at those buttons! Those are cockpit-esque buttons. Look at that white ceramic tap labelled 'HOT'. That is industrial grade. Fanta-shtik! **Anzacoffeee.com**

SMEG DOLCE AND GABBANA

ESPRESSO MACHINE

Belleza. Belleza. Belleza.

Look at the Sicilian motif embellishing this contraption.

The colours seem to peel off and come alive to grab your senses by the throat.

Beautiful. Beautiful. Beautiful.

SHAZE'S THE CAFFEINATOR

Oh yes, you do most of the work here. But still, it is a machine in every technical sense of the word. A magnificent golden, Archimedean piece of equipment. See how cleverly the scoop is affixed via a bolt on the rear? See how the base resembles a burner? Brilliant!

THE RATIO EIGHT COFFEE MACHINE

Is it a Lab Apparatus? Is it for mixing solvents and churning out dyes? Does it produce syrups? What is it? It is a super looking drip coffee machine with aluminium body and wood accents. It emulates the pour-over method. The Barista-in-you-ear pour-over method. It does hold the kitchen together quite nicely too. **Ratiocoffee.com**

THE BARISEUR COFFEE AND TEA ALARM CLOCK

It is not enough to just have an alarm. It is not enough to have a programmable coffee maker to sync with your alarm. It is enough though, to have both in one device. It is enough that it is by the bedside brewing away as you fumble for the snooze button. It is enough that it can be bought in this planet earth. Wake up and smell the coffee, dummy!

THE CHEMEX OTTOMATIC

This looks like someone snatched your showerhead and water jug and reconfigured them into a coffeemaker. It has that pour-over feel with evenly spraying water jets at the ideal temperature. It has the Chemex Carafe to boost, which looks good as always and premium too.

THE BREVILLE BES870BSXL BARISTA EXPRESS

A semi-automatic espresso machine made of bloody good looking brushed steel and controlled precise espresso extraction. This is through a (PID) digital temperature control powered by a 1600W Thermocoil. It has a Dose controlled grinder as a bonus. **Breville.com**
